Prepared by Northvalley Intelligence LLC

EVIDENCE BASIS

Generated from inspection GEN-014-20260714T211320Z and its retained evidence. No new site inspection was performed.

EVIDENCE COVERAGE

90%

Observed discovery components in the source inspection.

Executive Summary

WHAT WE FOUND

Pinklily runs on shopify (detected at High confidence). Across 6 observed discovery surfaces, 3 strengths and 0 issues were identified from retained inspection evidence.

PLATFORM
shopify
Detected at High confidence from observed payloads.

INSPECTION STATUS
partial
Overall confidence: Medium.

OBSERVATIONS
28
Bounded endpoint observations behind this report.

Discovery Scorecard

Surface	Score	Basis
Search	100/100	queries returning at least one result / queries attempted (8 observations, Medium confidence)
Autocomplete	100/100	typed prefixes receiving at least one suggestion / prefixes attempted (8 observations, Medium confidence)
Filters & Facets	100/100	successful probes / probes attempted (2 observations, Medium confidence)
Recommendations	100/100	successful probes / probes attempted (3 observations, Medium confidence)
Mobile Experience	100/100	successful probes / probes attempted (2 observations, Medium confidence)
Rendered Storefront	100/100	queries whose rendered page showed products / queries captured (5 observations, High confidence)

Scores are directional and explainable: each is the stated ratio over the bounded observation set, not a weighted model.

Key Findings

STRENGTH · SEARCH

Every attempted search query returned products (8 of 8).

Customers searching Pinklily with these query styles reach product results instead of dead ends. Search is carrying discovery traffic to sellable inventory for the observed query set.

STRENGTH · AUTOCOMPLETE

Every typed prefix received suggestions (8 of 8).

Customers get guidance before submitting a search, reducing typing effort and misses. Assisted queries convert better than unassisted ones.

STRENGTH · RENDERED STOREFRONT

Every rendered search page showed products to the customer (5 of 5), verified in a real browser with screenshots retained.

What the search API returns is actually reaching the customer-facing page. Endpoint-level results are confirmed as customer-visible, strengthening every search claim in this report.

HOW TO READ THIS

Every finding ties to a retained evidence file from inspection GEN-014-20260714T211320Z; nothing here is opinion without an observation behind it. Surfaces that could not be observed carry no claims.

What This Report Does Not Claim

- Scores are directional, computed from 28 bounded observations, not a full catalog benchmark.
- Rendered evidence covers search pages and autocomplete dropdowns on desktop; rendered browse, product-page, and mobile capture are not yet included.
