# Executive Summary

**WHAT WE FOUND**

Pinklily runs on shopify (detected at High confidence). Across 6 observed discovery surfaces, 3 strengths and 2 issues were identified from retained inspection evidence.

**PLATFORM**
**shopify**
Detected at High confidence from observed payloads.

**INSPECTION STATUS**
**partial**
Overall confidence: Medium.

**OBSERVATIONS**
**28**
Bounded endpoint observations behind this report.

## Discovery Scorecard

| Surface | Score | Basis |
|---|---|---|
| Search | 100/100 | queries returning at least one result / queries attempted (8 observations, Medium confidence) |
| Autocomplete | 100/100 | typed prefixes receiving at least one suggestion / prefixes attempted (8 observations, Medium confidence) |
| Filters & Facets | 100/100 | successful probes / probes attempted (2 observations, Medium confidence) |
| Recommendations | 100/100 | successful probes / probes attempted (3 observations, Medium confidence) |
| Mobile Experience | 100/100 | successful probes / probes attempted (2 observations, Medium confidence) |
| Rendered Storefront | 100/100 | queries whose rendered page showed products / queries captured (5 observations, High confidence) |

Scores are directional and explainable: each is the stated ratio over the bounded observation set, not a weighted model.

# Key Findings

MEDIUM · RENDERED STOREFRONT

**Typing "90's nostalgia" showed no visible autocomplete suggestions in the browser, although the suggest endpoint responds for this store.**

Customers typing this query get no type-ahead assistance and must compose the full search themselves. Assisted discovery is lost for this query pattern even though the backend could support it.

MEDIUM · RENDERED STOREFRONT

**Typing "accessorize yourself gift guide" showed no visible autocomplete suggestions in the browser, although the suggest endpoint responds for this store.**

Customers typing this query get no type-ahead assistance and must compose the full search themselves. Assisted discovery is lost for this query pattern even though the backend could support it.

STRENGTH · SEARCH

**Every attempted search query returned products (8 of 8).**

Customers searching Pinklily with these query styles reach product results instead of dead ends. Search is carrying discovery traffic to sellable inventory for the observed query set.

STRENGTH · AUTOCOMPLETE

**Every typed prefix received suggestions (8 of 8).**

Customers get guidance before submitting a search, reducing typing effort and misses. Assisted queries convert better than unassisted ones.

STRENGTH · RENDERED STOREFRONT

**Every rendered search page showed products to the customer (5 of 5), verified in a real browser with screenshots retained.**

What the search API returns is actually reaching the customer-facing page. Endpoint-level results are confirmed as customer-visible, strengthening every search claim in this report.

## Opportunity Matrix

| Classification | Opportunity |
|---|---|
| Strategic Improvement | Check the storefront search app or predictive-search configuration for coverage of "90's nostalgia"-style queries. |
| Strategic Improvement | Check the storefront search app or predictive-search configuration for coverage of "accessorize yourself gift guide"-style queries. |

HOW TO READ THIS

Every finding ties to a retained evidence file from inspection GEN-014-20260715T021342Z; nothing here is opinion without an observation behind it. Surfaces that could not be observed carry no claims.

## What This Report Does Not Claim

- Scores are directional, computed from 28 bounded observations, not a full catalog benchmark.
- Rendered evidence covers desktop search pages, autocomplete dropdowns, and mobile-viewport search pages; rendered browse and product-page capture are not yet included.
