# Why Nearby School Buyers May Not Choose Boxercraft

Prepared by Northvalley Intelligence LLC — June 29, 2026

**EXECUTIVE ANSWER**

A PTA can be close to Boxercraft and still not choose Boxercraft because the site does not package the company as a local school T-shirt partner. The site has useful ecommerce capability, but the local school buyer does not get a clear elementary-school path, local proof, or consistent search/autocomplete/browse recovery.

**LEAD CONVERSION**
**100/100**
Strong contact/quote signal.

**MOBILE EXPERIENCE**
**100/100**
Phone research is supported.

**MESSAGE CLARITY**
**0/100**
Local average: 75/100.

## Attention Hook

For a PTA member about 20 miles away, the public site does not expose an elementary-school browse category. The observed school-specific browse nodes are Lambert-related, and those labels returned 0 search and 0 autocomplete products in the GEN-007 parity pass. The site can look like a general apparel catalog rather than the nearby answer for school shirts.

## What Works Versus What Blocks The PTA

| Area | What works | Pain point for a school buyer |
|---|---|---|
| Action path | Lead Conversion scored 100/100 in the clipboard benchmark. | The buyer must first understand that Boxercraft serves their school use case. |
| Mobile | Mobile Experience scored 100/100. | A good mobile shell does not solve missing school navigation or weak local proof. |
| Discovery | Broad catalog, filters, public wholesale search, and some exact search terms work. | Search 58/100, autocomplete 42/100, browse 48/100; only 5/60 core nodes had exact search/browse parity. |
| Local trust | Boxercraft is nearby per stakeholder context. | Local Visibility 20/100, Trust Signals 14/100, AI Discoverability 25/100; local competitors make service area and proof easier to see. |

## Executive Diagnosis

| Likely PTA reaction | Why this matters |
|---|---|
| "I do not see my kind of school." | No observed elementary-school category; school browse signals are narrow and Lambert-related. |
| "Search did not help me." | School labels can have browse inventory while returning 0 search/autocomplete products. |
| "I need examples and ordering confidence." | PTA buyers need minimums, timeline, artwork help, sizes, approvals, reorders, and a person to contact. |
| "A local printer looks simpler." | The clipboard benchmark shows Boxercraft behind local competitors on Local Visibility, Message Clarity, Trust Signals, and AI Discoverability. |

Evidence sources: GEN-004 search/autocomplete normalization, GEN-006 competitor benchmark, GEN-007 browse-node parity, and user-provided clipboard website benchmark. The 20-mile PTA context is stakeholder-provided and should be verified before external use. Clipboard benchmark was partial, medium confidence.

## Priority Moves

| Move | Executive reason |
|---|---|
| Make schools a first-class buyer path | Add visible navigation and a landing path for elementary schools, PTAs, staff shirts, field day shirts, fundraisers, clubs, spiritwear, and reorders. |
| Align school terms across search, autocomplete, and browse | If a school browse node exists, the same label should work in search and autocomplete. This is the fastest bridge from the attention hook to the broader discovery problem. |
| Add local school proof | Show nearby school examples, group-order process, quote expectations, turnaround guidance, artwork help, and approved local service details. |
| Package the PTA job, not just the catalog | Volunteers need a low-risk path: choose apparel, upload or request artwork help, confirm sizes, approve, reorder, and contact a person. |

## 90-Day Roadmap

| Timing | Action | Outcome |
|---|---|---|
| Weeks 1-2 | Launch a local school apparel page and add it to navigation. | PTAs see the offer before they search. |
| Weeks 2-4 | Add elementary-school, PTA, spiritwear, staff shirt, field day, fundraiser, club, and reorder synonyms to discovery rules. | Fewer false dead ends across search, autocomplete, and browse. |
| Month 2 | Add local proof, group-order guidance, quote expectations, and school-specific FAQs. | Stronger trust and decision clarity. |
| Month 3 | Run a recurring school-buyer parity check across browse nodes, search, autocomplete, and quote paths. | School discovery remains aligned as catalogs change. |

## Positioning To Test

**BOARD-LEVEL READOUT**

The problem is not that Boxercraft lacks capability. The problem is that local school buyers cannot quickly recognize, trust, and find that capability.

**Local school spiritwear, made easy.** Help PTAs, principals, coaches, and staff order T-shirts, spiritwear, and event apparel without starting from a blank catalog search.

Next validation: confirm actual local service radius, approved school examples, turnaround and minimum-order details, and whether authenticated wholesale/custom-order workflows change the school-buyer journey.
