ECOMMERCE INSPECTION DELIVERABLE

Product Discovery Executive Report

Allbirds runs on shopify (detected at High confidence). Across 3 observed discovery surfaces, 2 strengths and 1 issue were identified from retained inspection evidence. 3 surfaces were not observable and carry no claims in this report.

Executive Summary

WHAT WE FOUND

Allbirds runs on shopify (detected at High confidence). Across 3 observed discovery surfaces, 2 strengths and 1 issue were identified from retained inspection evidence. 3 surfaces were not observable and carry no claims in this report.

PLATFORM
shopify
Detected at High confidence from observed payloads.

INSPECTION STATUS
partial
Overall confidence: Medium.

OBSERVATIONS
19
Bounded endpoint observations behind this report.

Discovery Scorecard

Surface	Score	Basis
Search	Not observed	5/11 submitted search observations completed.
Autocomplete	100/100	typed prefixes receiving at least one suggestion / prefixes attempted (11 observations, Medium confidence)
Filters & Facets	Not observed	0/2 facet markup observations completed.
Recommendations	100/100	successful probes / probes attempted (3 observations, Medium confidence)
Mobile Experience	Not observed	0/2 mobile user-agent observations completed. HTTP-level only; rendered mobile capture remains a platform capability gap.
Rendered Storefront	100/100	queries whose rendered page showed products / queries captured (5 observations, High confidence)

Scores are directional and explainable: each is the stated ratio over the bounded observation set, not a weighted model.

Key Findings

MEDIUM · RENDERED STOREFRONT

No visible autocomplete dropdown was captured for any typed query, while the suggest endpoint returns suggestions.

Customers may not be receiving the type-ahead assistance the endpoint evidence implies. Autocomplete claims in this report are endpoint-verified but not confirmed as customer-visible.

STRENGTH · AUTOCOMPLETE

Every typed prefix received suggestions (11 of 11).

Customers get guidance before submitting a search, reducing typing effort and misses. Assisted queries convert better than unassisted ones.

STRENGTH · RENDERED STOREFRONT

Every rendered search page showed products to the customer (5 of 5), verified in a real browser with screenshots retained.

What the search API returns is actually reaching the customer-facing page. Endpoint-level results are confirmed as customer-visible, strengthening every search claim in this report.

Opportunity Matrix

Classification	Opportunity
Strategic Improvement	Verify whether the storefront uses a third-party search app or a theme that suppresses the native dropdown.

HOW TO READ THIS

Every finding ties to a retained evidence file from inspection GEN-014-20260715T023352Z; nothing here is opinion without an observation behind it. Surfaces that could not be observed carry no claims.

NOT OBSERVED

Search could not be observed: 5/11 submitted search observations completed. Filters & Facets could not be observed: 0/2 facet markup observations completed. Mobile Experience could not be observed: 0/2 mobile user-agent observations completed. HTTP-level only; rendered mobile capture remains a platform capability gap.
