Scores are directional and explainable: each is the stated ratio over the bounded observation set, not a weighted model.

# Key Findings

MEDIUM · AUTOCOMPLETE

**Typing "allow discounts" produced no suggestions.**

Customers typing this get no assistance and must compose the full query themselves. Unassisted journeys have higher effort and higher abandonment risk.

MEDIUM · AUTOCOMPLETE

**Typing "brooklinen kule" produced no suggestions.**

Customers typing this get no assistance and must compose the full query themselves. Unassisted journeys have higher effort and higher abandonment risk.

HIGH · RENDERED STOREFRONT

**The rendered page for "allow discounts" loaded but showed no products, even though the search endpoint returns results.**

Customers see an empty or broken results page despite matching inventory existing. An API-only view would miss this; the customer-facing experience is losing demand the backend could serve.

HOW TO READ THIS

Every finding ties to a retained evidence file from inspection GEN-014-20260715T024207Z; nothing here is opinion without an observation behind it. Surfaces that could not be observed carry no claims.

NOT OBSERVED

Search could not be observed: 3/11 submitted search observations completed.
