## Discovery Scorecard

| Surface | Score | Basis |
|---|---|---|
| Search | 92/100 | queries returning at least one result / queries attempted (12 observations, Medium confidence) |
| Autocomplete | 100/100 | typed prefixes receiving at least one suggestion / prefixes attempted (12 observations, Medium confidence) |
| Filters & Facets | 100/100 | successful probes / probes attempted (2 observations, Medium confidence) |
| Recommendations | 100/100 | successful probes / probes attempted (3 observations, Medium confidence) |
| Mobile Experience | 100/100 | successful probes / probes attempted (2 observations, Medium confidence) |
| Rendered Storefront | 100/100 | queries whose rendered page showed products / queries captured (5 observations, High confidence) |

Scores are directional and explainable: each is the stated ratio over the bounded observation set, not a weighted model.

# Key Findings

HIGH · SEARCH

**The query "back to school" returned zero results.**

Customers using this wording hit a dead end and must guess new terms or leave. Zero-result searches are directly abandoned demand.

MEDIUM · RENDERED STOREFRONT

**No visible autocomplete dropdown was captured for any typed query, while the suggest endpoint returns suggestions.**

Customers may not be receiving the type-ahead assistance the endpoint evidence implies. Autocomplete claims in this report are endpoint-verified but not confirmed as customer-visible.

STRENGTH · AUTOCOMPLETE

**Every typed prefix received suggestions (12 of 12).**

Customers get guidance before submitting a search, reducing typing effort and misses. Assisted queries convert better than unassisted ones.

STRENGTH · RENDERED STOREFRONT

**Every rendered search page showed products to the customer (5 of 5), verified in a real browser with screenshots retained.**

What the search API returns is actually reaching the customer-facing page. Endpoint-level results are confirmed as customer-visible, strengthening every search claim in this report.

## Opportunity Matrix

| Classification | Opportunity |
|---|---|
| Quick Win | Check catalog coverage, synonyms, and normalization for "back to school", and design the zero-result page to offer recovery paths. |
| Strategic Improvement | Verify whether the storefront uses a third-party search app or a theme that suppresses the native dropdown. |

HOW TO READ THIS

Every finding ties to a retained evidence file from inspection GEN-014-20260715T025309Z; nothing here is opinion without an observation behind it. Surfaces that could not be observed carry no claims.
